

Starla Says...

- preserve the beauty of the natural night sky
- increase safety
- reduce energy waste
- save money on energy costs
- preserve wildlife and ecosystems
- benefit human health
- preserve night sky heritage for future generations

To minimize the harmful effects of light pollution, lighting should:

Only be on when needed

Only light the area that needs it

Be no brighter than necessary

Minimize blue light emissions

Be fully shielded (pointing downward)

Greg Rakozy

**City of Jonestown is pursuing the preservation of our night sky for our future generations.**

**Let's all do our part to make this happen.**

What can we do to preserve our night sky?  
Are your lights affecting others?

Step outside and look!

- \* Are my lights trespassing onto my neighbors property?
- \* Are my lights glaring on the lake?
- \* Am I lighting only what I need when I need it?
- \* Am I shielding my lights and directing them downward?
- \* Am I using only warm white, energy efficient light bulbs?
